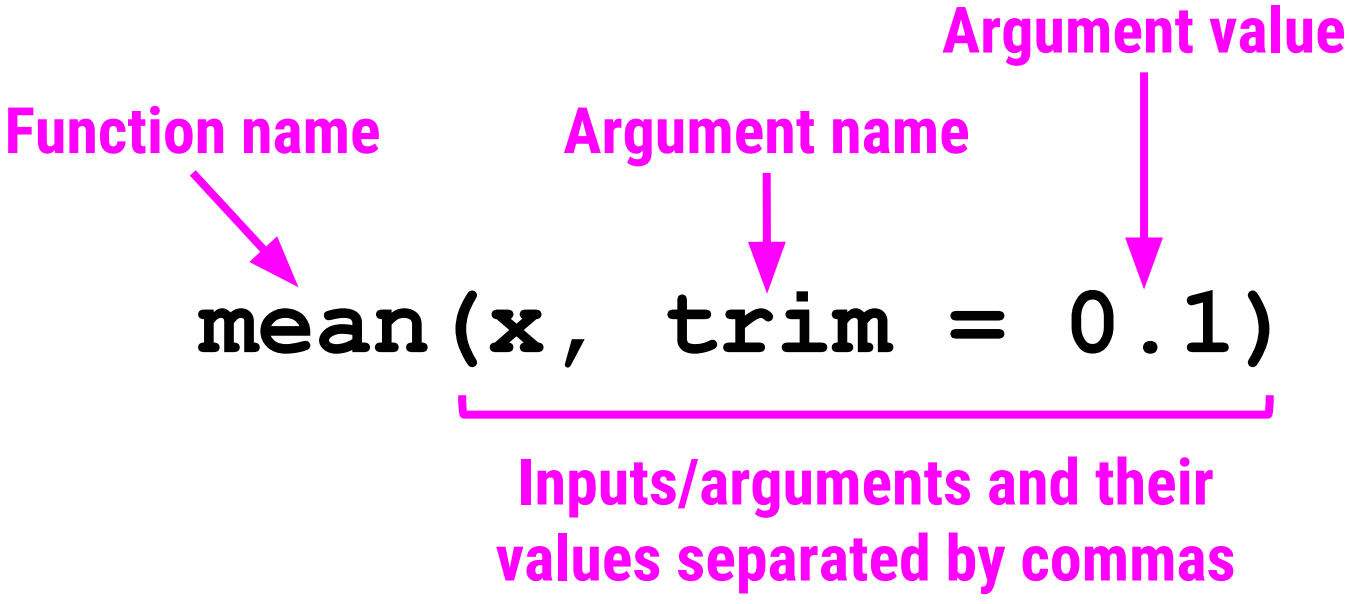
# Basic Commands

R

# Functions

- Inputs: supplied to the function
  - Detail how you wish to view, summarize, or manipulate an object
- Outputs: returned by the function. Often come in the following forms:
  - Summary of information in an object (e.g. mean, median)
  - Manipulated version of the object (e.g. adding column labels)
  - Completely new object (e.g. results of an analysis procedure with raw data as input)

# Functions



Argument value
Function name
Argument name
mean(x, trim = 0.1)
Inputs/arguments and their
values separated by commas

# Questions when exploring data

- What is this object?
- How big is this object?
- Are there named features of this object?
- What does this object look like?

# What is this object?

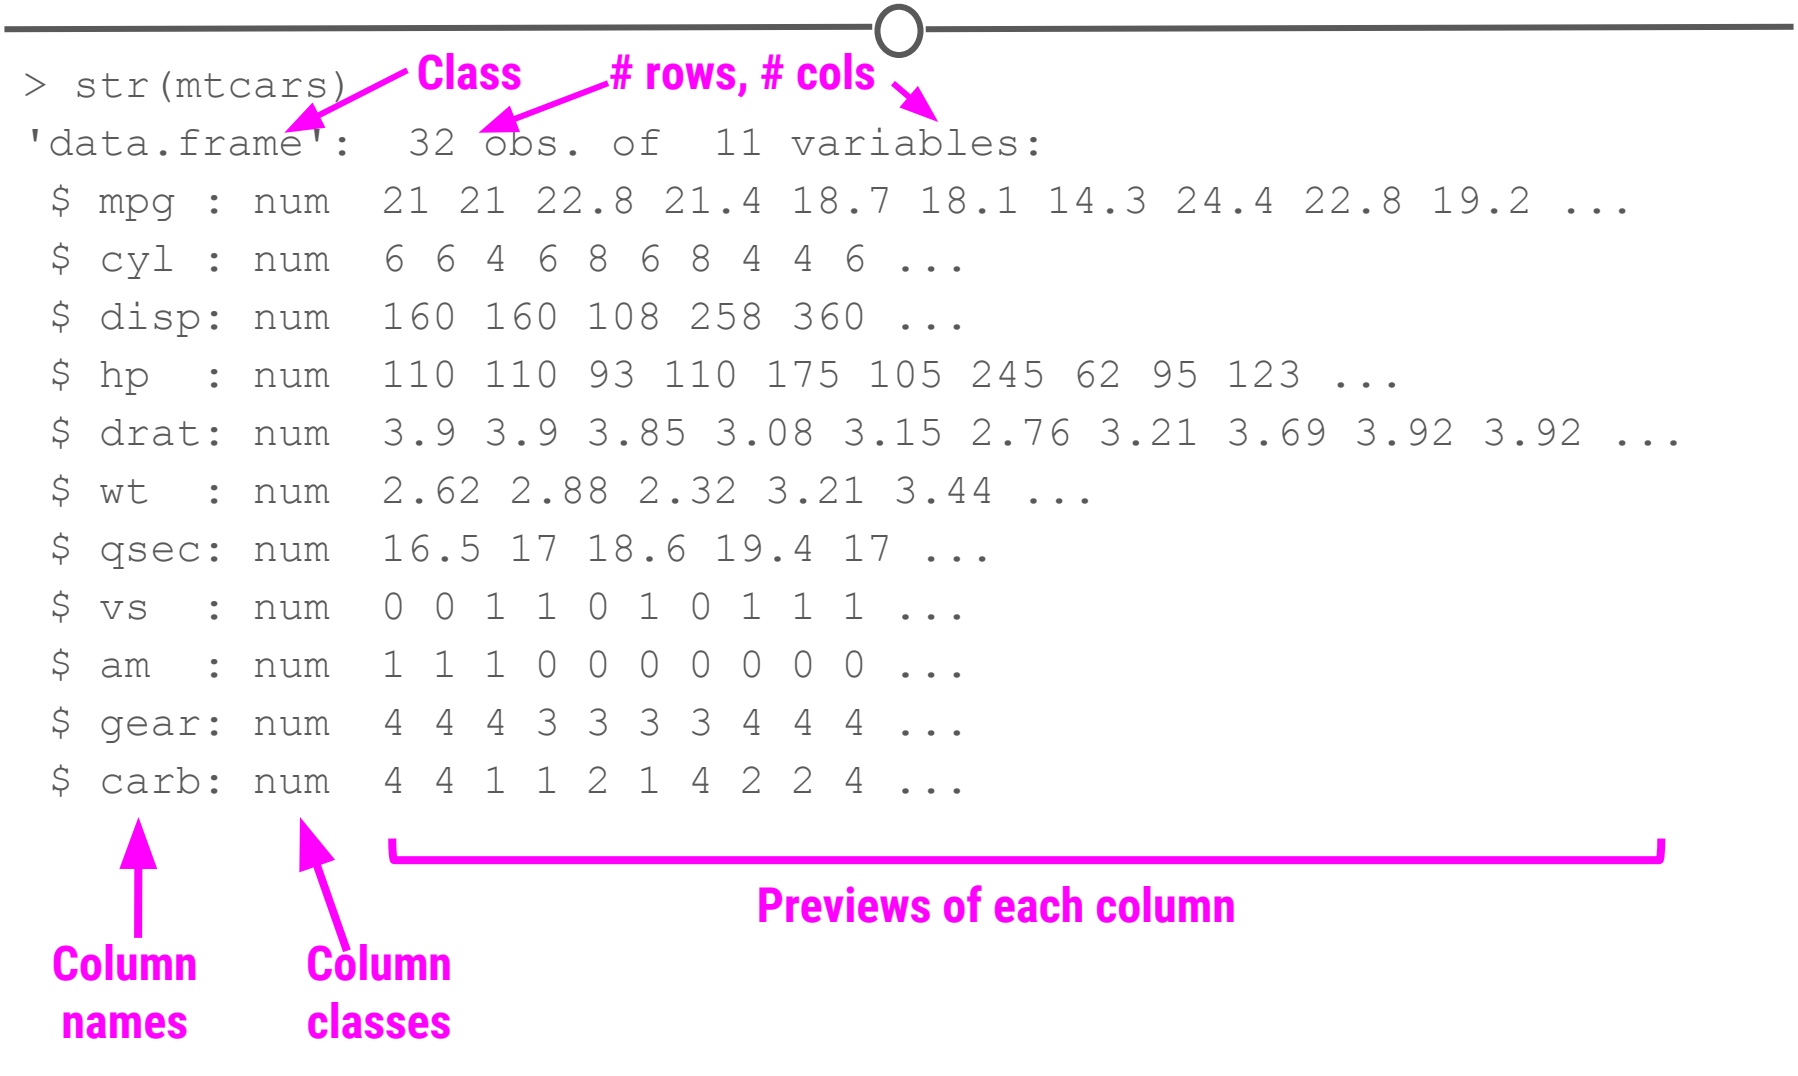
# `class()` function

```
> x <- 1:10
> class(x)
[1] "integer"

> y <- c(1.1,2.2)
> class(y)
[1] "numeric"

> class(mtcars)
[1] "data.frame"
```

# `str()` function



# How big is this object?

# `dim()` function

```
> dim(mtcars)
[1] 32 11

> nrow(mtcars)
[1] 32

> ncol(mtcars)
[1] 11
```

# `length()` function

```
> x <- c(1, 10, 3)
> length(x)
[1] 3
```

# Are there named features of this object?

# `names()` function

```
> prize_money <- c(1000, 500, 250)
> names(prize_money) <- c("first", "second",
"third")
> names(prize_money)
[1] "first"  "second" "third"
```

**Better to make this a two-column data frame:**

```
> prize_info <- data.frame(
    money = c(1000,500,250),
    place = c("first", "second", "third")
)
```

# `colnames()` and `rownames()` functions

```
> colnames(mtcars)
 [1] "mpg"  "cyl"  "disp" "hp"   "drat" "wt"   "qsec" "vs"   "am"   "gear"
[11] "carb"

> rownames(mtcars)
 [1] "Mazda RX4"           "Mazda RX4 Wag"       "Datsun 710"
 [4] "Hornet 4 Drive"      "Hornet Sportabout"   "Valiant"
 [7] "Duster 360"          "Merc 240D"           "Merc 230"
[10] "Merc 280"            "Merc 280C"           "Merc 450SE"
[13] "Merc 450SL"          "Merc 450SLC"         "Cadillac Fleetwood"
[16] "Lincoln Continental" "Chrysler Imperial"   "Fiat 128"
[19] "Honda Civic"         "Toyota Corolla"      "Toyota Corona"
[22] "Dodge Challenger"    "AMC Javelin"         "Camaro Z28"
[25] "Pontiac Firebird"    "Fiat X1-9"           "Porsche 914-2"
[28] "Lotus Europa"        "Ford Pantera L"      "Ferrari Dino"
[31] "Maserati Bora"       "Volvo 142E"
```

**Index of first element in the line**

# What does this object look like?

# `print()` function

```
> print(mtcars)
> mtcars
```
